

For Maximum Performance!

Beeman

the finest Experience in Precision Airguns

GENERAL: PLEASE READ

Precision airguns are made to be used often. Keep a good supply of pellets, targets, and cleaning and maintenance equipment on hand.

The use of high quality accessories will add to the enjoyment and satisfaction. Low quality substitutes, rather than getting by, are often a great deal more trouble than they are worth. Not all accessories are needed by everyone, but as proficiency increases, many of them become more valuable. To take full advantage of the accuracy potential of these precision sporting airguns, a scope with proper rings is desirable. **Scopes not specifically designed for airguns will not provide satisfactory service or durability. See pages 17, 6 and 10 for airgun a selection of airgun scopes.**

Every Beeman airgun that we sell is stamped with the Beeman name and qualifies for all Beeman warranties. Each has been tested and inspected by qualified Beeman specialists.

Beeman RX-2 Air Rifle

-the airgun with the invisible mainspring

With its unique "Gas Spring" the extremely powerful Beeman RX-2 produces ultra-high velocity at 1125 fps in .177 cal and 960 fps in .20. The .22 is rated at 860 fps while still delivering great accuracy! Barrel-break cocking compresses the gas filled mainspring. No gas is released on firing and with no steel mainspring to add weight, fatigue or take a set, vibration is lessened. The Beeman RX-2 has a brown/brown laminated stock for good looks and for warp-free stability.

The popular RX-2 has a lot going for it with all of the quality, accuracy, and styling you expect from Beeman combined with shortened lock time due to the unique "Gas Spring". An exciting air rifle.

With fully adjustable iron sights, the RX-2 also include a built-in scope rail grooved for easy scope mounting. Uses standard airguns rings.

The adjustable trigger is crisp and clean for precise control. A dream to shoot.

Lots of power and accuracy for your largest airgunning targets.

Beeman

Airgun Scope Accessories

A quality airgun deserves a quality scope in order to achieve its full accuracy potential. All Beeman scopes are made to exacting standards and will provide years of use on all airguns and are suitable for use on magnum centerfire rifles! **DO NOT use regular rifle scopes on magnum airguns as they are not designed to withstand airgun type recoil and will not focus sharply at typical airgun distances.**

All scopes adjust for windage and elevation.

We also carry RWS and Bushnell Airgun Scopes

Beeman Scope Mounts

All scope mounts listed are for standard 1" diameter scopes (BEE5031 is 30mm tube) and fit all Beeman, RWS and Bushnell airgun scopes. Except where listed for a specific model, all will fit all standard BEEMAN, RWS, Marksman, and Daisy airguns. HIGH mounts are usually necessary for mounting scopes over 40mm on most airguns and allow a more "heads up" shooting position.

Air Rifle Scopes

We offer scopes by Bushnell, RWS, GAMO and Centerpoint.

All are 1" tube and are rated for airguns.

RWS Airgun Scopes

Airgun Scope Rings (scope mounts)

BEE5040

BEE5030M

BEE5039 Adjustable Mount, 1-Piece with Scope Stop. Also ideal for RWS and others. This rugged Adjustable Mount can be used on even the most powerful spring powered airguns.

BEE5030H

Beeman 1" Scope Mounts

BEE 5030M, 5030H, 5040 Ruggedly built with wide clamping surfaces & four cap screws on each ring. All for use with scopes to 40mm objective, 5030H All have a removable recoil stop pin. BEE5039 is Adjustable for Windage and Elevation is similar in appearance to 5040.

30mm Scope Mounts

see FSI 6450 and FSI 6460 page 20

Beeman Scope Accessories

A **SCOPE STOP** is necessary on all magnum airguns to prevent the scope mount from sliding on the rail.

The **Pro Scope Stop** is recommended for the R-10 and is desirable on the HW77, R-1, R-7, R-8 rifles. Extra attractive and easy to install.

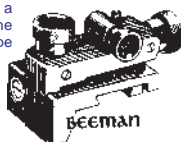

The **BEE5092 Scope Stop** is particularly recommended for the Beeman P-1, Kodiak, C1, Webley airguns, FWB124 and FWB127. Also fits almost all other models. Top is cut with a standard 11mm dovetail so that a pair of the BEE5092 act as a scope riser block for extra scope clearance. Removable recoil pin.

Filler Screws are special screws to protect rear sight mounting holes on R-series rifles when the rear sight has been removed

Sport Aperture Rear Sight with finger adjustment knobs (BEE5823). Easily attaches to the scope rail on all Beeman sporting air rifles without modification. For those not wanting a scope, use of this peep sight is an excellent way to increase accuracy. A great improvement over the barrel mounted rear sights.

AIR RIFLE SCOPES

Every good air rifle deserves a good scope. It is important to use a quality scope that is rated for airguns. Even on low recoil airguns it is you must be able to focus at the distances we airgunners shoot- not just 50+ yards like comon scopes.

Bushnell 4x32mm and 3-9x32mm see page 17
RWS 4x32mm and 3-9x40mm see page 6
Crosman 4x32mm and 3-9x see page 16

We also have a number of airgun scopes made by Bushnell. For Sportsman, Trophy, and Banner series airgun scopes..... see page 17
Red Dot Sights..... pages 17 and 16
