

Beeman Pellets

simply the world's finest

BEEMAN offers an extensive selection of pellets in all calibers to suit your needs. A variety of pellets should always be on hand for particular situations. Experimentation with different pellets should be encouraged. Often a pellet that performs satisfactorily at one distance may be exceptional at a longer or shorter range. Some are better in the wind. As each airgun is an individual, there is no "best pellet" for a particular purpose; try several.

Please DO NOT USE STEEL BB'S IN ANY BEEMAN OR OTHER PRECISION AIRGUN.

Beeman Pellets are among the World's Finest!
