Airgun Choices

Confused?

The Airgun Revue #1

The publishers of *The Airgun Letter*, published six volumes of the *Airgun Revue*, all of which are out-of-print and have been unavailable -- until now. We are fortunate to have obtained a limited supply the only remaining publisher's stock of the first of these informative works. With 100 pages, in 8x11 format, each is filled with a wealth of articles and photos of interest to airgunners; information that will never be out of date.

The *Revue* has no advertising; it's just packed solid with articles and stories by Tom Gaylord and a few selected, knowledgeable airgunners--articles which never appeared in the *Airgun Letter*. These articles cover a variety of topics technical, informational, historical. There is plenty for everyone in *The Airgun Revue*.

This may be the last chance to add this valuable works to your airgun

FSI 0101 The Airgun Revue #1 \$11.88

Every square inch of *The Airgun Revue* is packed to the max with technical information and stories of interest to airgunners everywhere. They had to put the Table of Contents in the front cover!

Non-Lead Pellets and Velocity and other considerations

Non-Lead Pellets: GAMO Raptor/others - Pellets and velocity ratings -- Gamo has a new, lightweight, non-lead pellet in .177 which they claim can give up to a 25% increase in velocity. In addition, they have relabeled several of their airguns using this rating and now show two velocities; one with Raptor pellets and one with lead pellets. What is actually a 1000 fps airgun is now rated "1250 Raptor / 1000 lead". We prefer the other approach and will continue to emphasize the lead pellet rating with Gamo and others. Don't be confused by the new, higher Raptor ratings -- the guns haven't changed, only the pellet.

Raptor and other non-lead pellets are of a hard, non-lead alloy and do not behave like lead pellets in certain situations --- never use these pellets with a metal pellet trap or target or when shooting against any hard surface. They are strictly for outdoor use. We carry non-lead pellets are from RWS, Crosman and Gamo. NOTE: These cautions apply to all non-lead pellets and steel BBs regardless of brand

Order by mail, phone or online

YOU CAN HELP WITH THE PROCESSING OF YOUR ORDER

WE TRY HARD TO PROVIDE YOU WITH THE BEST POSSIBLE SERVICE. You can make the processing of your order run smoother.

IT IS YOUR RESPONSIBILITY TO KNOW WHAT YOU NEED. We cannot tell you which items are suited for your needs or are compatible others.

USE YOUR ADDRESS OF RECORD (mailing address): usually the address on your FFL, catalog label or Credit Card address. Our records are based on this address. You may specify an alternate Shipping Address (see below). A phone number MUST be included.

ALTERNATE SHIPPING ADDRESS: to ship to an address other than the Billing Address for your card you MUST call your bank to register an Alternate Shipping Address. Call the customer service number on the card.

ADDRESS Help: please help find your address -- note any special directions which may help FedEx find your address without delay. **INCLUDE a telephone number & EMAIL.**

WE STRIVE TO GIVE PROMPT SERVICE: We begin processing your order immediately-- orders are often processed and shipped within an hour of receipt. Be sure your order is complete when calling or mailing. It is very difficult to change orders once processing begins. IF A CHANGE IS REQUIRED or for later questions, you must call our Customer Service Department at (906)-482-1685. Changes may delay shipping. The Phone Salesman has no contact with your order after it has been placed.

WHEN SENDING PAYMENT FOR MERCHANDISE that has been put "ON HOLD" by phone: include your mailing address, shipping address and a full list of items ordered (include caliber, etc.). Indicate that the merchandise is "ON HOLD."

WE NEED ALL PERTINENT INFORMATION regarding caliber, color, size, etc. Unless specified, we will always assume that guns, grips, etc. are for a Right Hand shooter.

WE KEEP A LARGE INVENTORY: Backorders for any lengthy period are seldom necessary - usually only if the factory is out of stock. Backorders will be shipped automatically upon receipt. You may indicate "no backorders."

PLEASE RESPOND PROMPTLY if we contact you about your order

PRICES ARE SUBJECT TO CHANGE WITHOUT NOTICE. We make every effort to keep prices stable throughout the life of our Catalog/ flyer and buy in quantities that often allow us to continue "old pricing" for extended periods. If it is necessary to change due to factory increases, we will try to inform you when you order. If your catalog is not current or if making a tight quote please call, write or check www.airgunsusa.com.

WE CARRY ONLY THE MERCHANDISE LISTED in this Catalog. Some specialty items can be special ordered -- ONLY in the lines we carry.

Thank You for placing your order with us.

- Please use your Customer I.D.# when available (found on address label and invoices).
- Please include Stock# and Description.
- We DOUBLE BOX all guns for safe delivery.
- Nearly 99% of all orders are shipped the same day!
- AIR orders received by 2:00 PM will be shipped the same day!
- We carry one of the largest inventories of airguns and supplies in the country.
- Beeman "Select Options" are available on many models. Ask your salesman.
- Phone Salesman can not tell you what is "best" for your customer. He can, however, tell you what is most popular.

Note: we sell Wholesale Only and, therefore, can not verify compatibility of the various items or provide warranty service.

Mounts for Benjamin and Sheridan Rifles

-- a new solution --

FSI6440

BEN272

It has been difficult to conveniently install a scope on the Benjamin and Sheridan multi-pump pneumatic and CO₂ air rifles like the Sheridan Silver Streak and Blue Streak or the Benjamin 340 and 390 series because the BEN272 4-PC Base attaches on the barrel which moves the scope forward and usually requires a long eye relief (pistol) scope. The new FSI 6440 Offset Mount allows the scope to extend 1-1/2" farther back than would be normal. This is just enough to allow the use of a conventional 1-inch tube air rifle scope with these rifles. So, if you've been looking for a simple solution to scoping your Benjamin 340/342 or 392/397 or the Sheridan Silver Streak or Blue Streak, there's the answer. Everything fits in place to allow easy access for loading and cocking.
