

FSI News & misc.

TELEPHONE HOURS: Monday - Thursday from 9am to 4:30pm Friday 9am-2pm eastern time. In today's complex market we find that we need one day to concentrate on the things that are necessary to keep the merchandise flowing such as training, ordering and follow-up and taking care of the catalog and web site. We're still working, just not able to take calls outside of these hours. FAX, email & on-line orders anytime. **Please note: we are no longer mailing catalogs. You may view or download a copy from our website at AirgunsUSA.com**

IT GETS CRAZIER EVERY YEAR. It used to be that we'd get a price list from a manufacturer and it wouldn't change all year. Models would remain pretty much the same from year to year and certainly within the year. Things seemed to almost be engraved in stone. Lately nothing is static - prices, models and entire lines seem to change at the drop of a hat. We had four 'revised' price/model lists from one major company last January alone. A complete product line came and went within weeks. So, as much as we try to keep our print catalog current and up to date, it isn't always possible or maybe even likely. **WE WILL keep our website up to date and you may also call to verify pricing and availability.**

There are a few late introductions this year:

Benjamin Marauder PCP 10-shot bolt action air rifle producing up to 1100fps in .177 and 100fps in .22 cal. With it's match trigger and increased velocity the Marauder is going off the charts. And it is QUIET. Extreme long range accuracy. **The Marauder is absolutely amazing!**

Browning 800 Mag Air Pistol - .177 rated 700fps - A good buy for the economy minded shooter. Credited with extremely high velocity, it still is capable of fine accuracy in the field.

FSI EZ-Plus Scope Mount Rings in several styles including 1-Piece and 2-Piece versions and a new **Offset mount that is ideal for many Crosman and Benjamin air rifles** - page 20

RWS - Many new variations of popular models and several new rifle + scope packages available. New German-made youth model. See pages 4 & 5

BEEAMAN RX-2 now available in .177 and .22 calibers for lots of power, accuracy and comfort.

Walther Talon and Falcon Hunter packages available in .177, .22 and the smashing .25 caliber. **Loads of Power** at an economical price. **These are HOT!** Page 8

Benjamin/Sheridan/Crosman. Lots of exciting stuff!
Discovery PCP Air Rifle complete with pump all for under \$400. pg 15
Discovery rifles, pump and accessories available
Super Streak Ultra-magnum spring-piston rifle w/ special scope, Thumbhole stock pg 15
TAC-1 Extreme tactical look with bipod, scope, laser, light. Synthetic stock Page 15
CenterPoint Scopes & accessories. page 16

BB Repeaters - multi shot BB firing CO2 repeaters. Three models from Crosman and the and Baby Desert Eagle from Umarex. Page 26

FSI Headline NEWS

Special Sales -- throughout this catalog

Fall - Winter Schedule

In order to spend time with family and friends, we traditionally close for a few days during the Holidays.

Thanksgiving
Closed Thursday and Friday.

Christmas

Closed December 24 - New Years

Shipping resumes on Jan 4th

We wish you and all those around you a safe and happy Holiday period and a very Happy New Year.

ON-LINE ORDERING

You can place your orders any time day or night safely via our secure server. Be sure to visit our web site at:
<http://www.airgunsusa.com>

RWS COMBOS -- Air Rifle & Scope Combos -- selected for extra Value and Economy. Many variations to chose from.

RWS 4x 32mm Air Rifle Scopes - Big factory sale - RWS Model 300 and Model 350 Compact Air Rifle Scopes are now on sale. Order several at this fantastic price. Don't forget, air rifle scopes work well on centerfire and rimfire rifles too. Order while supplies last. Pg 6 & 20

IN STOCK -- The RWS 5G Magnum (also known as the P-5 Magnum in Europe). **Yes, we have a good supply of this hard to get air gun in stock.** **Left Hand Accessory Grip** now available See page 5

Enhanced Edition: FSI Advanced Airgun Ballistics by Frank S. Brychta is now available with a **Companion CD** prepared by Mark D. Rainville. see page 21

Remington, Crosman, Benjamin Air Rifle and Scope COMBOS are now available. Barrel cocking spring-piston .177 cal airguns rated at 1,000 fps. Complete with scope and mounts. **NEW Quest Combo in .22 cal.** Look at page 15 for these and other new products from Benjamin/Sheridan/Crosman.

The **Daisy 853C** and **Daisy 953** air rifles are great for accuracy-minded younger shooters and grow to fit adults. We've been getting some amazing feedback. page 16

Now it's easy to put a scope on your Benjamin or Sheridan air rifle.

It has been difficult to install a scope on the Benjamin and Sheridan multi-pump pneumatic and CO2 air rifles like the Sheridan Silver Streak and Blue Streak or the Benjamin 340 and 390 series because the BEN272 4-PC Base attaches on the barrel which moves the scope forward and usually requires a long eye relief (pistol) scope. Now you can use a rifle scope and you can put the scope where it belongs. SEE PAGE 20

Many popular models of multi-shot CO2 air pistols from **Walther, Colt, Beretta.** Don't overlook the NIGHT-

HAWK with all it's goodies. Cool stuff! Pages 14, 18, 25, 26.

FSI FT Premier Poly Packs - for years we've been extolling virtues of the Premier FT pellet but some still haven't tried 'em. So we offer **The FSI FT Poly Pack.** We've filled the FSI Poly Tin with your favorite Premier FT pellet-try them all. page 9.

FSI airgun books around the world--so far several countries in Europe and South America plus exotic spots like Iceland, Russia, Portugal and New Zealand--the list keeps growing and the people keep it interesting. A number airgunning's "big names" have purchased FSI books, but it was especially exciting when **Dr. Robert Beeman** added **FSI Advanced Airgun Ballistics** and **FSI Airgun Ballistic Tables** to his research library.

BEEAMAN SCOPE MOUNTS The **Beeman BEE5039 Adjustable Mount** is still the best adjustable mount on the market. They also have a great 1-inch mount with a scope stop for the Kodiak and for Webley rifles. . pg.12

AIRGUN CHRONOGRAPH (page 22) Lighted for indoor use. If you are serious about airgun ballistics, our F1 Chrony with the Indoor Shooting Fixture is just the ticket. More sensitive--a larger "sweet spot" which makes capturing velocities even easier. It works with airguns and it works indoors where wind and other problems are controllable. It works outdoors, too, and with firearms, arrows and just about anything else.

E-MAIL I will attempt to answer all who have questions related to FSI and the products we carry. **Include your correct email address--nothing happens without it.** My email address is: airgun@airgunsusa.com

YOU MUST USE THE WORD "AIRGUN" in the subject line or I may not see it. With up to 1100 spam emails every day I have had to resort to using filters to help sort out the legitimate letters. **Support efforts to reduce internet spam.** **The FSI web page is at: <http://www.AirgunsUSA.com>** You'll also find lots of factory info at: www.air-rifle.net

Tasco **RED DOT** Sights and Scope Rings. Page 17
CenterPoint Red Dot Sight. Page 16

Some products in this catalog contain lead. Do not place any product containing lead in your mouth. Wash your hands after handling lead products and before eating and smoking.

Airguns are not toys and safe gun handling must be practiced at all times. **Younger shooters must have adult supervision.** Read and understand all operating instructions before using any airgun. Check local laws before ordering.

Support local youth shooting programs such as 4-H, scouting and other youth groups. Take a young person shooting or enroll them in a youth program: get them started on the right path. They are the future of our sport. Include the whole family. Target shooting can easily become an enjoyable family sport.

Homeland Security is affecting us all in many ways. One is that everything coming into the USA gets increased scrutiny both overseas and by US Customs. Nearly every box received shows signs of being examined or opened. This is unavoidable and is one of the prices we must accept in the name of Homeland Security. Even though the box may not be pristine, the merchandise is not affected.

Finding best pellet for your airgun:

Since each airgun is unique, there is no sure way to tell which pellet will perform best in your airgun without testing them **in your gun.** Those which work well in another airgun of the same model will likely work well in yours, but you will probably be able to do better by testing. There is definitely not a pellet that will work for all situations -- you will need a variety of "bests" to fulfill all of your needs, and they will change with each airgun in your battery.

Finding the "best" pellet is a big part of the fun of precision airgunning

First: decide what the requirements are: Will you be shooting at long range? short range? ten meter paper target? Will you need knockdown? penetration?
Second: test a variety of pellets on paper at the range you will likely be shooting,

selecting the two or three that give the best accuracy.

Third: test other requirements; test knockdown with suitable targets (metallic silhouette or field target). Test penetration with ballistic putty, stacked newspaper, or other consistent medium.

Fourth: record your results: when testing several airguns with a variety of pellets you'll find that pellet "A" may work best in gun "X", but that pellet "B" is exceptional in gun "Y". It is impossible to remember which combinations worked so well after as short while.

Pellet Sampler Packs can help.

RWS and FSI offer pellet sampler packages which include samples of several different types of pellets. These will allow you to test a variety of pellets without buying full tins of each one. **Have Fun.**

When all else fails, read the instructions. **Bad Move**

(maybe a very bad move)

In conversation with an RWS Airgunsmith he estimated that over 90% of the problems and a high percentage of the failures they encounter could have been avoided by reading the instructions.

customers don't read our terms. So, we are asking you to please read any operating and maintenance instructions or warnings BEFORE using any new product. And please, please, please read our sales terms and call or write if you have questions about them before ordering. See page 2.

Don't wait until all else fails . . . It might be too late.

We occasionally run into similar misunderstandings when

No excuses. Thanks!
