

## Baby Desert Eagle CO<sub>2</sub> BB Pistol

Recoil action repeater

Taiwan

For some double-tough BB action powered by CO<sub>2</sub>, look no further than the Baby Desert Eagle by Magnum Research. Packed with a bonus Picatinny rail for the top-side and a built-in Picatinny rail on the bottom, this air pistol is ready to be loaded up with the optical accessories of your choosing. 15 BBs load into the built-in BB magazine and the grip plates slide back to reveal the 12g CO<sub>2</sub> compartment. This is a lightweight and affordable BB air pistol that provides great fun or is a great gift idea.

### THE PERFECT SPRING GUN SHOT

Follow these 12 steps for improved results.

1. Spring piston airguns take 500-1000 shots to fully break in. Groups may be erratic for the first 100 shots or so.
2. "Do not" bench rest on ANY solid object! Rest your hand and place the gun in your hand. Even better, buy an inexpensive sand bag and fill with sand.
3. Rest the stock on the sand bag. "Never" the barrel.
4. Do not pull the trigger if the barrel is bent down. The barrel will fly up, bend and could cause injury. A cracked and/or broken stock will occur. Guaranteed!

5. Whether your rifle is a break barrel or underlever, you should always keep one hand on the cocking lever.
6. Hold the gun "loosely" at the fore-end, at the grip, and in the shoulder. Spring guns become "inaccurate" if held tightly.
7. Changing your shooting position or grip can and will change your point of impact.
8. Scopes should be mounted 2.75" to 3" away from your eye.
9. Squeeze the trigger, don't jerk or pull it.
10. After squeezing the trigger, stay on target for a couple of seconds. Follow through is very critical!

11. \*Remember each rifle is an individual and has its own characteristics. To achieve the best performance, you should try a sampler pack of pellets to see which pellet your gun shoots the best.
  12. Your rifle, your pellet, and your scope doesn't know where the target is. It's up to you to point it straight!
- Good luck and shoot straight! Courtesy of Beeman Precision Airguns  
**NEVER** allow anyone to 'dry-fire' any spring-piston airgun. That is, never fire an airgun without a pellet in it.

**TASCO 42mm Red Dot Sight** -- This huge 42mm tube Red Dot sight features an 11 position intensity control. With built-in rings for Weaver-style base. A perfect match for any rifle or handgun using a Weaver-style base. Rated up to .357 Magnum handguns.
