FSI POLY-tin

The FSI POLY-tin is one of those handy gadgets we're always finding new uses for. Perfect for a day's supply of pellets in the field. No more jammed or loose pellet tin lids which take two hands to open or spill pellets in your pocket. Clean white, washable. The FSI POLY-tin holds small parts and accessories, grease and paste lubricants, and lots more...

- 2" diameter x 1" high (3 in³ volume)
- Featherweight, unbreakable white polyethylene.
- Easy use - flip open, snap shut.
- Airtight, moisture protection.
- Attached lid — no dropped or lost caps.

- Write directly on lid top with a marker or use stick-on labels.
- Versatile - holds small parts, accessories.

Package of 4 stock# FSI 8002 \$5.99 per package

Carry Pellets in the field.

FSI Premier FT Poly Pack

I've talked about how great these Premier FT pellets are for long-range field and target use. These are the ONLY pellet that I recommend that everyone try in every gun and I very seldom hear of a gun in which they do not shoot exceptionally well. Some shooters, however seem to need a little extra coaxing. Well, here they are, at the right price and in the right quantity for your next outing—No more excuses. Do yourself a favor and check them out.

Outstanding Field Target accuracy and performance plus the exceptional convenience and portability of the reusable **FSI Poly Tin** make the **FSI FT Premier Poly Pack** an ideal way to have the perfect pellets when and where you need them.

Which pellets are best for your airgun?

That's the hardest airgunning question to answer. Each airgun will shoot it's best with a particular pellet under specific conditions: range, wind, game, etc. The only answer is to test a variety of pellet each airgun. Always test at the distance(s) you'll be using the pellet—often a pellet which is exceptional at short range is not impressive at longer distances. Conversely, some pellets won't prove to be exceptional until they get out there a ways. The only way to know is to test them in your airgun.

FSI Deluxe Pellet Packs are designed to let the serious shooter test a variety of our most popular pellets by the leading manufacturers. Importantly, each pellet is in a quantity to allow you to make a useful evaluation, saving you both time and money.

FSI Deluxe Pellet Packs come in a high quality, compartmented polypropylene box with heavy duty, heat sealed hinges; not the brittle styrene most commonly used by others.

Which Pellet ??

Three of the major factors in accuracy are:

- 1) The Shooter
- 2) The Airgun
- 3) The Pellet

Let's look at them (briefly) in order:

1) The Shooter:

Even if you've just won "The Big Match," and you probably didn't, you'll admit that staying in practice is a key. A surprisingly little practice on a regular basis can make a dramatic difference.

2) The Airgun:

All of the adult precision airguns from noted makers like RWS and Beeman are capable of remarkable accuracy. With proper lubrication and a little care and by making sure that the stock and other screws are kept snug, they will give years of excellent accuracy.

3) The Pellet:

Although the first two above will be fairly obvious to most airgunners, many are not aware of the need to test a variety of pellets in each individual airgun. Each airgun is unique—even if they are of the same make, model and caliber.

A novice may be handicapped (and not even know it) for years with little or no progress because he/she continues the one or two types of pellets originally purchased with the airgun. A more serious airgunner might not be getting top performance because she/he has continued to use the same pellet that gave excellent results in another airgun of the same or, even worse, a similar model. A serious airgunner might be making a mistake if it has been more than a year or two last testing a variety of pellets for best accuracy at particular distances.

Follow the example of the consistent leaders:

- 1) practice, practice, practice
- 2) keep the airgun in tip-top shape
- 3) never, ever be completely satisfied that you have found the best pellet.
